

ABHISHEK SHUKLA

India | ashikla693@gmail.com +91-7238919365 [Linkedin](#) | [Website](#) | [Twitter\(x\)](#) | [Github](#)

Cybersecurity professional experienced in SOC operations and automation, specializing in threat detection, alert triage, and incident response across enterprise environments.

TECHNICAL SKILLS

Security Operations : SIEM, Splunk , Wireshark, Threat Detection & Analysis, Incident Response, Log Analysis , Cyber Kill Chain , MITRE , NIST, ISO 27001

Application Security : SAST, DAST, SCA, Threat Modeling, OWASP Top 10, Secure SDLC

Tools : EDR/XDR , SentinelOne, Nessus ,Nmap ,Burp Suite, SOAR, AD

Security Automation : Python Bash, CI/CD , Docker, Terraform

WORK EXPERIENCE

Cybersecurity Analyst

Gradient Cyber (Texas , USA - Remote)

June 24 – Present

- Monitor and investigate **50+ daily security alerts** across multiple **EDR/XDR** platforms — **Cortex XDR**, SentinelOne, Carbon Black, Sophos, and **CrowdStrike Falcon** — maintaining **95-99%** incident identification accuracy
- Analyzed **Active Directory** logs and endpoint telemetry to detect unauthorized access, privilege escalation, and lateral movement
- Managed **SIEM** ingestion from 10+ sources, ensuring data integrity/normalization for real-time detection/forensics
- Integrated security into **CI/CD pipelines** for automated vulnerability scanning, enhancing security
- Accelerated mitigation by 30% and boosted **SOC efficiency** through problem-solving **Python automation** for triage, enrichment, AI analysis, Slack/AD alerts, and ELK extraction.
- Performed **SentinelOne** Deep Visibility investigations of processes, networks, and files
- Managed stakeholder relationships with global clients, delivering security advisory and cross-functional collaboration while providing **24/7 SOC monitoring** and incident response.
- Integrated **SAST/DAST** tools (Trivy, SonarQube) into CI/CD pipelines using **GitHub Actions** for automated vulnerability scanning and policy enforcement, enabling shift-left security and continuous compliance monitoring .

Security Intern

GLBAI (Pune, India)

Mar 23 –Aug 23

- Conducted comprehensive vulnerability scans using industry-standard tools including **Nessus**, **Nmap**, and other security assessment utilities to identify and prioritize security weaknesses.
 - Performed web application security assessments using **Burp Suite**, identifying OWASP top 10 vulnerabilities and helping to remediate them for improving overall application security posture.
 - Developed a static company client website using HTML, CSS, and JavaScript, supporting internal and client-facing communication needs.
-
